CAPABILITY STATEMENT

WHO WE ARE

Ashire Technologies & Services, Inc. understands that organizations increasingly rely on digital technology to operate their businesses, making them more vulnerable to cyber-attacks and data breaches if proper security measures are not in place. Risks include financial losses, reputational damages, organizational disruptions, and penalties—legal and regulatory.

Our Information System Security professionals (ISSM, ISSO, SCAR) are committed to providing quality, safeguarded, measurable expertise to support our client’s compliance with government and organizational cyber security requirements.
